

Make a Book Nook!

Did you know research shows that one of the best predictors of a child's reading success is how much time they actually spend reading?! Your first family project is to create your very own Book Nook-a special spot where your child can go to read together with someone or independently. All you need is a cozy spot away from it all where you can relax and escape through a book! Fill that spot with a blanket, small lamp, pillows, and anything else that makes your Book Nook a comfortable place to be. Attached is a bag-you and your child decorate it together. Each week your child will take home small books created in school, books checked out from our school and classroom library, and other reading materials. Keep them in the decorated bag-your "Book Bag"-and store them in your Book Nook. By the end our time together you should have quite a library!!

Happy Reading!
